

LED MIRROR

with Dimmable LED Lighting

TOOLS & MATERIALS REQUIRED

Screwdriver

Spirit Level

Pencil

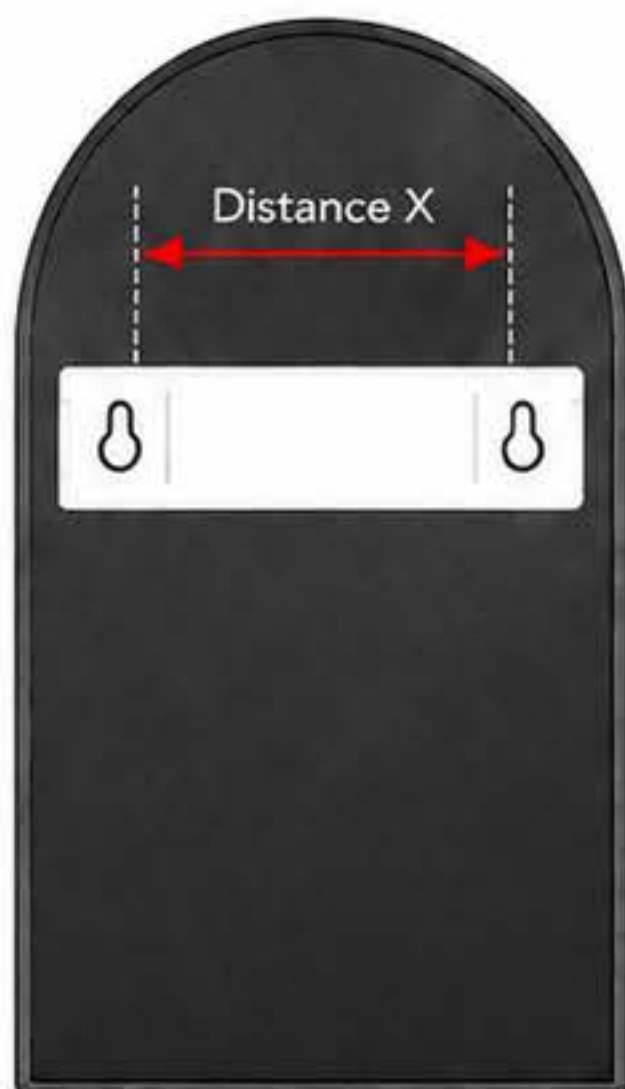

Tape Measure

Drill

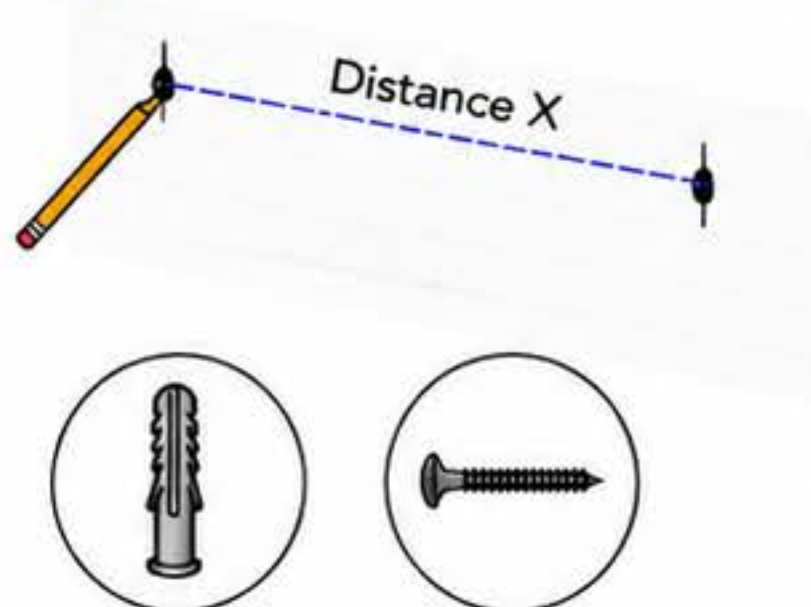

INSTALLATION

1 MEASURE MOUNTING DISTANCE

Measure and record the distance (X) between the centers of the mounting holes located on the back of the mirror.

2 MARK THE MOUNTING LOCATION

1. Using the Distance X measurement recorded in Step 1, transfer that measurement to the desired location on the mounting surface.
2. Use a spirit level to ensure the two marks are perfectly level.
3. Mark the locations for the mounting screws.
4. Drill pilot holes at the marked locations.
5. Insert the supplied wall anchors (if required for your mounting surface).
6. Install the mounting screws, leaving approximately 5 mm (3/16 in.) of each screw head exposed to allow the mirror to hang securely.

3 MOUNT THE MIRROR

Carefully hang the mirror onto the screws by aligning the keyhole slots on the back of the mirror with the screw heads. Ensure the mirror is secured and level.

LED LIGHT OPERATION

ON / OFF
Tap the touch button to turn the light ON/OFF.

DIMMING
Press and hold for 2-3 seconds to adjust brightness.

POWER
Standard Type B plug. Cord length varies by model.

IMPORTANT SAFETY NOTES

- ✓ Use a qualified electrician if you are unsure about wiring.
- ✓ Always install on a solid, leveled surface.
- ✓ Ensure all hardware is securely tightened.
- ✓ Do not overtighten screws.
- ✓ Keep electrical components dry.
- ✓ For indoor use only.

BEFORE YOU BEGIN

Please read all instructions carefully before installation. Retain this guide for future reference.
