## Step 1

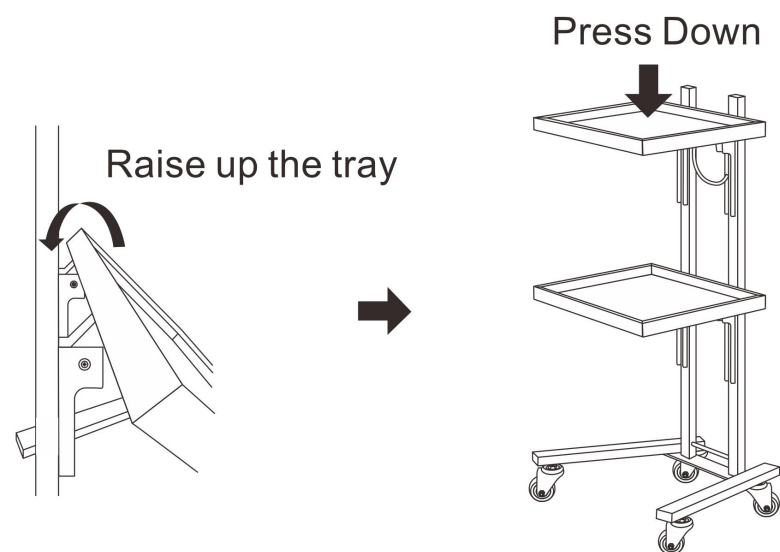

1. Locate the metal frame and remove the two bolts and washers from the bottom and set them aside.
2. Align the holes in the frame with the matching holes in the base and reinsert the bolts and washers to attach.
3. Use the provided wrench to fully tighten the bolts to secure the pieces in place. Do not overtighten as this may damage the bolt threads or the mounting holes.

## Step 2

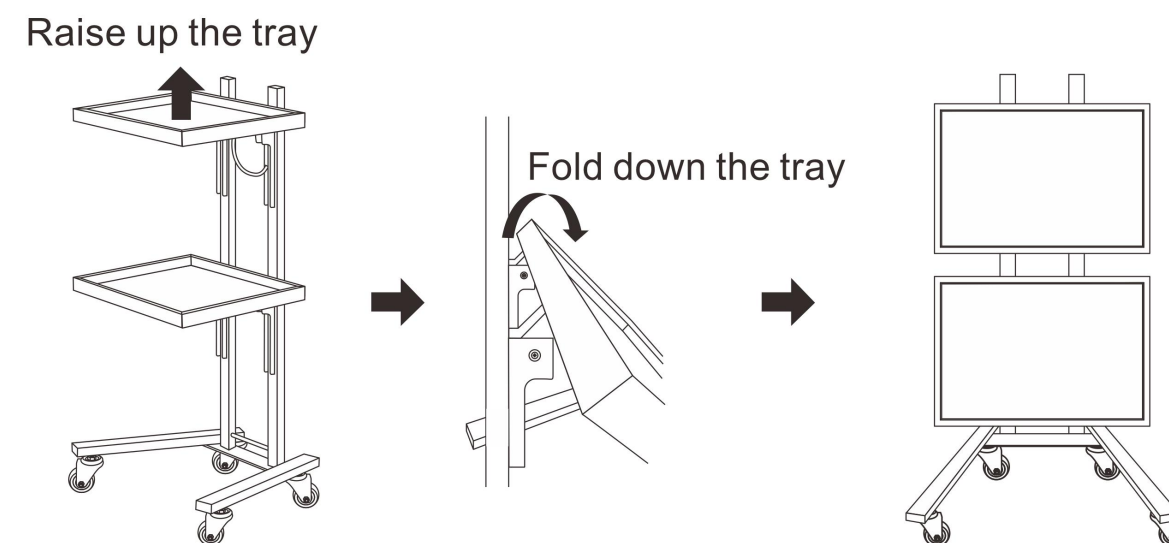

1. Place the tray on its side on a flat, stable surface and locate the four pre-drilled holes on the bottom of the base.
2. Insert one caster into each hole and turn it until fully attached and secured.
3. Ensure all casters are firmly attached and spinning freely before use.

## Step 3

1. To transition the trays from the storage position to the operating position, first grasp the front edge of the tray shelf and lift upward until the tray is level with the ground.
2. Once level, press downward slightly until you hear or feel the tray lock into place in the operating position.
3. Ensure the tray is fully secure before use.

## Step 4

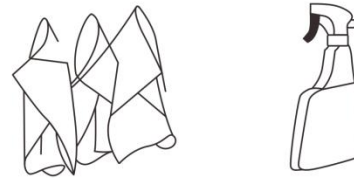

1. To transition the trays from the operating position back to the storage position, first grasp the front edge of the tray shelf and lift upward until you feel the mechanism release.
2. Slowly and gently lower the front of the shelf until it is fully vertical and flush with the metal frame.
3. Ensure it is securely positioned before moving or storing the unit.

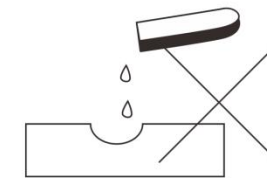

## Product care
