Step 1

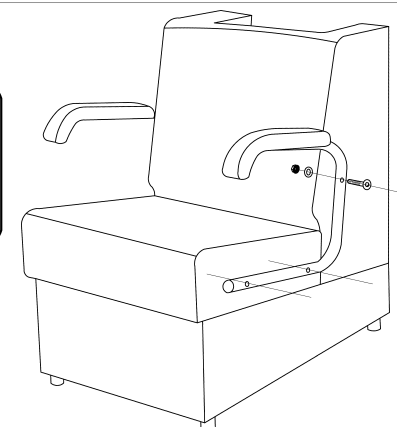

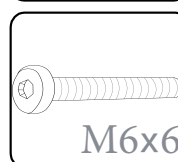

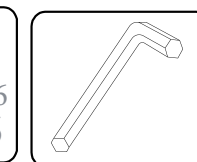

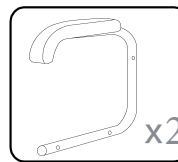

1. Locate the seat cushion and backrest and place them on a clean, dry surface, positioning both pieces as shown in the image above to align the mounting holes on both parts.
2. Insert an M8 bolt with a washer through the inside of the seat cushion and into the aligned holes as shown in the picture above.
3. On the opposite side, place another washer followed by an M8 lock nut and hand tighten to hold the bolts in place.
4. Repeat this same process on the other aligned hole.
5. Once both bolts are in place, securely tighten all hardware using the appropriate hex wrench.

Step 2

1. With the chair lying on its side, align the base with the seat and backrest already assembled. Ensure the backrest is positioned at the rear of the base, where the lower slope is located as pictured above.
2. Once the mounting holes are aligned, insert an M8 bolt with a washer through one side of the seat cushion and into the base.
3. On the opposite side, place another washer followed by an M8 lock nut and hand tighten to hold the bolts in place.
4. Repeat this process for the remaining three bolts.
5. Once all four bolts are installed, securely tighten all hardware using the appropriate hex wrench.

Step 3

1. With the dryer chair still on its side, position one of the armrests so that its mounting holes align with those on the chair frame as pictured above.
2. Once aligned, insert an M6 bolt through the armrest and into the chair frame.
3. On the opposite side, place a washer followed by an M6 lock nut and hand tighten to secure the armrest in place.
4. Repeat this same process for the remaining two bolts on the same armrest.
5. After all three bolts are installed, securely tighten them using the provided wrench.
6. Repeat the same steps to attach the armrest on the opposite side.
