Self-tapping screws

X4

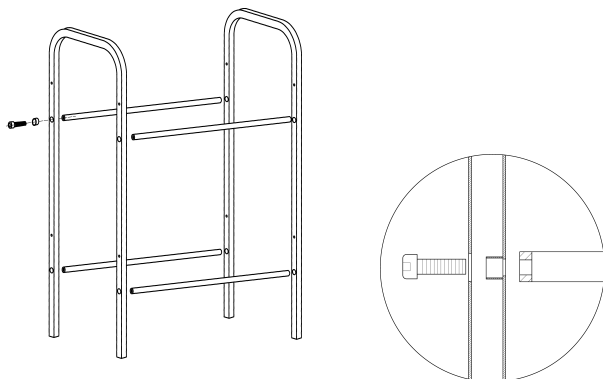

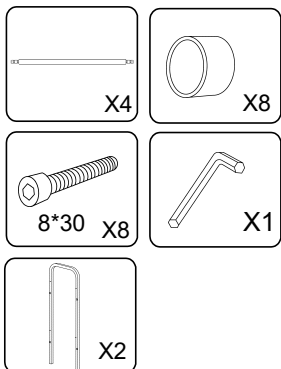

Caster

X1

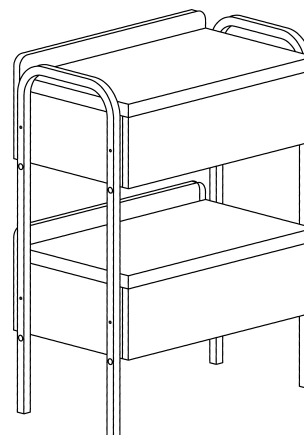

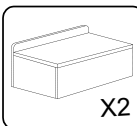

Wrench

## Step 1

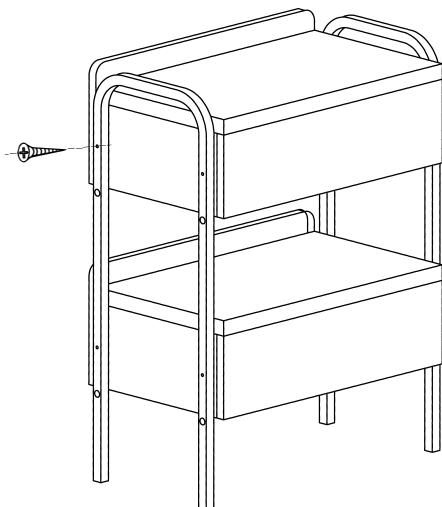

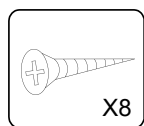

1. Remove the eight screws and metal sleeves from the ends of the support rods and set them aside.
2. Position the two cart frames so that the large holes face outward.
3. Align the four support rods with the corresponding holes on the frames. Ensure the small holes on the cart frames are facing inward.
4. Reinsert the eight previously removed screws through the metal sleeves and into the aligned holes on the work cart frames.
5. Use the included wrench to loosely secure the support rods into place.
6. Important: Do not fully tighten the eight screws at this stage. Leave them slightly loose to allow for adjustment during later assembly steps.

## Step 2

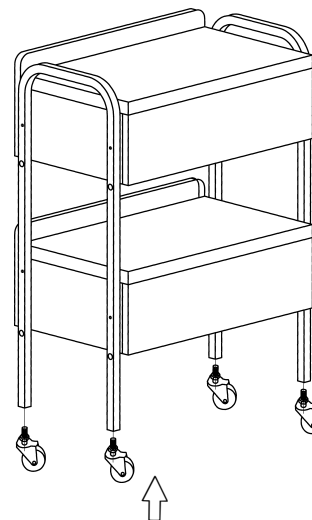

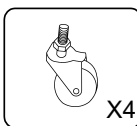

1. Position the two drawers on top of the support rods assembled in Step 1.
2. Make sure both drawers are properly centered on the frame.
3. Once aligned, use the provided wrench to tighten all eight screws securely from Step 1.

## Step 3

1. Use the provided eight self-tapping screws to attach the drawers to the cart frame. Insert the screws through the pre-drilled holes using a Phillips-head screwdriver. This will keep the drawers stable and prevent slipping.

## Step 4

1. Place the cart on its side on a flat, stable surface and locate the four pre-drilled holes on the bottom of the cart frame.
2. Insert one caster into each hole and turn it until fully attached and secured.
3. Ensure all casters are securely attached and rotate smoothly. If the cart is unbalanced, adjust the caster heights as needed to level the cart.

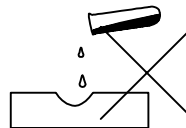

## Product care

Brush away excess hair

Clean surface with damp cloth or use simple soap & water solution.

Avoid using corrosive cleaning agents such as bleaches.

## Product Information

1. Enjoy your new Daniel White Utility Cart!
